DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is not clear if applicant claims a glass-ceramic panel or glass panel.

Clarification is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mitra et al (6,525,300) in view of Krause et al.

Mitra discloses a cooking surface for cooking food having a glass ceramic surface with a glass coating thereon (Title and col. 16, lines 36-67) and the coating having a temperature resistance between 400 and 600 degree C (col. 18, lines 20-25). However,

Art Unit: 3742

Mitra is silent regarding IR permeable coating on an underside of the glass-panel, heated and cooling zones and paint pigments.

Krause et al discloses a glass ceramic panel 1 providing a cooking surface having cooking zones 2 heated with IR source 3, a cool region 4 and a transition region 5, wherein the panel is provided with a solid colored IR permeable coating 6 on an underside of the panel comprising of paint and aluminum and plastic foils (col. 5, claim 12), paint pigments comprising organometallic solutions (col. 5, claim 3), the organometallic paint selected from a group consisting of noble metal resonates, anti-corrosive paints, and sol-gel layers (claim 3), and temperature resistance levels with a material having temperature resistance greater than about 350 degree C (Claim 2), and a second coating material having a temperature resistance to temperatures of up to about 350 degree C in cold zone 5 (claim 5). It would have been obvious to one having ordinary skill in the art to modify Mitra's invention to include cooking and cooling zones, IR permeable coating on an underside of the glass panel and paint pigments as taught by Krause in order that the surface of the glass having the underside coating is resistant to temperatures greater than 350 degree C (col. 5, claim 2).

Response to Arguments

5. Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
